

6 March 2023

Dear Stakeholder,

The Commonwealth Secretariat in collaboration with the Ministry of Industrial Development, SMEs and Cooperatives (Industrial Development Division) has secured the services of International Economics Consulting Ltd to assess the current state of Mauritius' manufacturing sector, the level of maturity of Mauritian manufacturing enterprises and its capacity to adopt high-end "Manufacturing 4.0" technologies. The output of this extensive study is expected to provide an effective foundation for a future capacity-building program to advise and upskill Mauritian manufacturers to adopt Manufacturing 4.0 technologies and processes.

We are thereby pleased to contact you to respond on the readiness assessment of your firm through a short survey. Filling out the survey gives your firm the opportunity of being selected for the capacity-building program. It normally should take between 10 and 15 minutes of your time. The deadline for completing the questionnaire is Monday 17 April 2023.

Concept

The online survey is broken down into 4 dimensions of Manufacturing 4.0, each containing a different set of questions:

Manufacturing and operations	To what extent does your company have digitally integrated and automated production and operations?
Smart products and processes	To what extent are the processes and products in your company digitally modelled and how is the collected data being used?
Strategy and organization	To what extent is Manufacturing 4.0 established and implemented in your company's strategy?
Supply chain	To what extent can advanced technologies be used to improve efficiency, transparency, and decision-making in supply chain management?

Terms of use, data privacy

We take the privacy of your personal information seriously. You are voluntarily providing your contact details and company name. The provided information will be securely kept confidential and will only be used for the purpose of this survey. The collected data will not be shared with any unauthorized third parties. You have the right to access, correct, or delete your personal information at any time by contacting us at info@tradeeconomics.com. Please review these terms carefully before participating in this survey. By submitting your responses, you acknowledge that you have read and understood these terms and consent to the use and protection of your personal information as described above.

For details on the survey please contact us at info@tradeeconomics.com.

Company General Information

* 1. Respondent and Company Profile
i. Name of company:
ii. Name of respondent:
iii. Phone:
iv. Email address:
v. Office address:
* 2. In which District are your manufacturing operations located? Please specify Town/Village. * 3. In which sector do you operate?
* 4(i). How many local employees does your company have?
Up to 19 employees
20 to 99 employees
100 to 249 employees
250 to 499 employees
500 or more employees

4(ii). How many foreign employees does your company have?
① 1 to 19
O 20 to 99
○ 100 to 249
250 to 499
○ 500 or more
5. When was the company established? [Year]
* 6. What is the percentage of local shareholding of your company?
<u> </u>
99 to 75
74 to 50
less than 50
0 (Operating under FDI)
* 7. What percentage of your customers is local?
<u> </u>
99 to 75
74 to 50
less than 50
8. What was your company's turnover last year?
C Less than Rs 1M
Rs 1M to Rs 10M
Rs 11M to Rs 30M
Rs 31M to Rs 100M
○ 101M to Rs 250M
Above Rs 250M

* Q	Which	technology	do vou	use in	vour	company?	[tick all	that apply	7 1
J.	VVIIICII	recilitorod A	uo vou	use III	voui	company:	i uck an	mat appr	٧I

- 3D printing is a process of creating physical objects by laying down successive layers of material under computer control.
- Big Data refers to the large, complex, and diverse sets of data generated by individuals and organizations, which require advanced technologies and techniques to process and extract valuable insights.
- Cloud computing is a technology that enables users to access and store data, applications, and resources through remote servers over the internet, instead of a local device or personal computer.
- Industrial Internet of Things refers to the interconnected network of physical device ıge

and other items embedded with electronics, software, sensors, and network connectivity, allowing for the exchar
of data and enabling the automation of various tasks.
- Machine learning is a subset of artificial intelligence that enables computers to learn and make predictions or
take actions based on data without being explicitly programmed.
- Robotics or Artificial Intelligence (AI) refers to the development and use of technology to simulate human
intelligence and behaviour in machines.
3D Printing
Big data
Cloud Computing
Industrial Internet of Things
Machine Learning
Robotics or Artificial Intelligence
None of the above
Other (please specify)
*40.11
* 10. How is your IT Department organised?
No in-house IT department (service provider used)
Central IT department
O Local IT departments in each area (production, product development, etc.)
IT experts attached to each department
* 11. Please specify the gender of the CEO of the company.
A male
A female
Does not want to identify
12. What is the share of female employees in your company (percentage)?
0 50 100

Section 2: Manufacturing 4.0 General Questions

Manufacturing 4.0 refers to the fourth industrial revolution, characterized by the integration of advanced technologies such as artificial intelligence, the Internet of Things, and robotics into the manufacturing process to create smart factories that are flexible, efficient, and capable of producing customized products.

* 13. Were you aware of Manufacturing 4.0 prior to this survey?	
Yes	
○ No	
* 14. Do you see the implementation of Manufacturing 4.0 as a priority for your f	ırm?
○ Yes	
○ No	
Please provide details.	
* 15(i). Has your firm embarked on any initiatives around Manufacturing 4.0?	
Yes	
○ No	
15(ii). If No, why is the company not implementing Manufacturing 4.0?	
15(iii). If Yes, please elaborate on any challenges faced when implementing Manufa 4.0.	cturing
15(iv). Are there any other activities/initiatives being undertaken that would comple	ment
Manufacturing 4.0?	

st 16(i). Do you require any support in implementing Manufacturing 4.0	?
Yes	
○ No	
16(ii). If Yes, please specify the area(s) in which your company needs consupport to achieve Manufacturing 4.0.	apacity-building
Cyber Security	
Design and implementation of solutions	
External expertise	
Finance	
Increase in awareness or training	
In-house expertise	
Strategy and leadership	
Technology	
Training	
Other (please specify)	
16(iii). If Yes, please also provide some details of the capacity-building sup A few examples of details needed are:	pport that is needed.
In which technologies or skills do you need support?	
Does the strategic and leadership team need awareness or training on Manufacturing 4.0?	
How much financing is needed? In which areas/departments financing is needed?	
Are adequate training capabilities available locally or must be sourced from abroad?	
la de	

Section 3.1: Manufacturing and operations

17. What is your level of competency in <u>manufacturing and operations</u> , notably in
the following areas? [Level 1: Beginner; Level 2: Intermediate; Level 3: Experienced;
Level 4: Expert)

* (i). Automation			
Level 1: None or or	nly a few machines can be con	ntrolled through automation.	
Level 2: Some mach	hines and system infrastructu	res can be controlled through	n automation.
Level 3: Most mach	nines and system infrastructur	res can be controlled through	automation.
Level 4: Machines a	and systems can be controlled	d completely through automa	tion.
* Please also indicate the	ne level you expect your	firm to be in 5 years wi	th regard to
automation.			
Level 1	Level 2	Level 3	Level 4
* (ii). Connectivity			
Level 1: Equipment information.	c, machinery, and computer-ba	ased systems are not able to i	nteract or exchange
Level 2: Equipment each other's inform	t, machinery, and computer-ba	ased systems are to some ext	ent able to exchange and use
Level 3: Equipment	c, machinery, and computer-ba	ased systems are partially int	egrated.
O Level 4: Equipment	c, machinery, and computer-ba	ased systems are fully integra	ated.
* Please also indicate the	ne level you expect your	firm to be in 5 years wi	th regard to
connectivity.			
Level 1	Level 2	Level 3	Level 4

* (iii). Digital modelli	•		
		ling, product or some other o	object that describes the form of
an existing or proposed of	-		
Level 1: No digital n			
Level 2: Some proce	esses use digital modelling.		
Level 3: Most proces	sses use digital modelling.		
Level 4: All relevant	processes use complete dig	ital modelling.	
* Please also indicate the modelling.	e level you expect your	firm to be in 5 years w	ith regard to digital
Level 1	Level 2	Level 3	Level 4
* (iv). Equipment			
Level 1: Significant	overhaul is required to meet	Manufacturing 4.0 model.	
Level 2: Some mach	ines and systems can be upg	raded.	
Level 3: Machines a	lready meet some of the req	uirements and can be upgrad	ed where required.
Level 4: Machines a	nd systems already meet all	future requirements.	
* Please also indicate th	e level you expect your	firm to be in 5 years w	ith regard to
equipment.			
Level 1	Level 2	Level 3	Level 4
* (v). IT			
_	usiness is not supported by I	Γsystems.	
_	usiness process is supported		
	-	ed by IT systems and integrate	tod with each other
Level 4: All areas of	the business are supported.	by IT systems and are fully in	itegrated with each other.
* Please also indicate th	e level you expect your	firm to be in 5 years w	ith regard to IT.
Level 1	Level 2	Level 3	Level 4

Level 1: Equipment is manually maintained in line with the maintenance schedule. Level 2: Some machines alert operators of performance issues which enables them to manually schedule a maintenance task. Level 3: Some machines are self-diagnosing, automatically passing information to the maintenance scheduling system. Level 4: Machines are generally self-diagnosing, and the maintenance schedule adjusts itself based on real-time data inputs from the machine. *Please also indicate the level you expect your firm to be in 5 years with regard to maintenance. Level 1	Level 2: Some machines alert operators of performance issues whi maintenance task. Level 3: Some machines are self-diagnosing, automatically passing scheduling system.	ch enables them to manually schedule a
maintenance task. Level 3: Some machines are self-diagnosing, automatically passing information to the maintenance scheduling system.
